Fit 4 Start #10 – Selected startups

ICT

Ceasy	LU	Ceasy is a social network that makes it easy for people to connect and share their calendars. It is providing not only a centralised user-friendly calendar but also a real time search engine.
CleverYak	LU	CleverYak is an SaaS solution for live online interviews that offers many functionalities, including allowing you to start your interview in about ten seconds through a simple link, without downloading or recording.
Cybavo	TW	CYBAVO offers a fully featured turn-key virtual asset custody platform, designed for finance institutions and fintechs, which is secure, convenient, and regulator-ready.
EmoHack	LU	Emohack is a mobile digital content (video games and video marketing) test protocol, embedding a Neurofeedback analytics engine that provides a data-driven assessment to boost professional content development.
iRoboInvest	BG	iRoboInvest provides robo-advisory software to banks that helps them automate their wealth management services, launch a digital investment advisor to their clients, and significantly increase the sales efforts of private bankers.
Kidola	LU	Kidola is an app that facilitates the flow of information between all the stakeholders involved in childcare facilities: parents, educators and their manager/supervisor.
Re(D)scue	LU	Re(D)scue is a combination of patented wearable devices in connection with smartphones. The purpose is to easily find people or things over long distances without the need for GPS or other networks, i.e. indoor or outdoor
SM Cloud	SK	SM Cloud help companies to build, manage and protect their clouds saving the priceless time via single platform which is a Multi-cloud service manager.
TiQuest	LU	TiQUest develops an API as well as a plug and play hardware connected to the printer of any cash system in order to crush data and translate them into bite-sized actions empowering shops to make smarter decisions for their business.
Zetako	LU	Zetako technology allows for faster and higher compression ratio using much less resources as well as offering the capability to deliver bandwidth reduction in real-time. Smaller files mean less cost and energy usage in transportation and storage helping the industry reduce its carbon footprint.

HEALTHTECH

Meracle pte Ltd	SG	Meracle pte Ltd develops the Whizz spacer, a medical device that provides immediate and actionable feedback to people affected by chronic respiratory conditions, such as asthma, COPD (Chronic Obstructive Pulmonary Disease) and COVID-19. The spacer is paired to a mobile application that makes compliance easy, trackable and provides daily alerts to simplify the treatment regimen, with a gamification function to help patients meet their goals.
MyelinH	LU	MyelinH is building a software platform for early detection, prediction of pandemics (COVID-19), and diseases, as well as patients' health status monitoring. The platform includes a toolkit with armband sensors , a digital microscope camera paired with an app for patients and a predictive analytics software .
Organo Therapeutics	LU	Organo Therapeutics has developed a 3D brain organoid in vitro technology, which, combined with their own analytical algorithms, creates a state-of-the-art pre-clinical phase drug development platform. The 3D models built can more accurately predict the efficacy of drugs on humans affected by neurodegeneration diseases compared to conventional systems.
PatchAi	IT	PatchAi is a cognitive platform that champions patient engagement to optimise health data collection, and in turn, improve patient care and experience. It transforms patient data collection through the adoption of Co-PRO (Conversational Patient Reported Outcomes) and integrates data-points from various devices and systems delighting patients and generating valuable insights with ease.
Wavy Assistant	NL	Wavy Assistant is an AI assistant app that allows INOCA (Ischemia and Non Obstructive Coronary Artery Disease) patients to manage their symptoms and lower their stress. INOCA Disease is a subtype of cardiovascular disease Angina Pectoris. When the AI detects stress, it offers the users to lower their stress by doing special music listening exercises. It does so by subtly adjusting the way the song sounds to the patient.

SPACE

Numer8	CZ	Numer8 develops Ofish, a solution to help in reducing the cost of daily fishing trips for fishermen, keeping fishermen safe with hyperlocal weather information and forecasting, and increasing their sales margin. It also enables traceability in the supply chain, fostering a fair trade model.
OKAPI:Orbits	DE	OKAPI:Orbits is a Space Traffic Management platform that delivers all relevant data and scientific processes necessary to operate and control assets in space.
ReOrbit: AB	SE	ReOrbit: AB develops modular, flexible, low-cost satellites that can be reused even after launch by using a next-generation platform that can be configured to host payloads as well as in-orbit manufacturing and from-orbit servicing.
SPiN	DE	SPiN proposes a solution called Multipurpose Adapter Generic Interface Connector (MAGIC) that allows connection of previously designed space-qualified subsystems of other missions to new satellite platforms.
Vingineers	FR	Vingineers has developed prototype analytics techniques based on satellite and drone imagery which improve the value of space-based imagery for precision viticulture.
