

## Fit 4 Start #9 – Graduated startups

### ICT

|                   |    |  |
|-------------------|----|--|
| <b>AnoteMusic</b> | LU | Investment platform for music rights. ANote created a marketplace for music rights where rights owners - such as artists, songwriters, record labels and publishers – are able to sell their future royalty flows to investors.  |
| <b>DataCue</b>    | SG | E-commerce is all about conversion, how many visitors turn to buyers. DataCue helps any e-commerce improve their conversion using personalization. DataCue shows different content in these widgets for each visitor.  |
| <b>Quantego</b>   | LU | Quantego has developed QUASAR, an intelligent computing technology that empowers companies to optimize their most challenging decision problems in the face of uncertainty. QUASAR's technology is based on the latest advances in machine learning and math programming.  |
| <b>Rebolet</b>    | GE | Technological system to help companies convert returns and overstock into sustainable profits. Clients track and control the flow of items from our online portal, providing them with transparency over the reselling process, tailoring the solution for every client.   |
| <b>Symvio</b>     | LU | Symvio is a cloud-based software solution that addresses technical facility managers and owners of large commercial buildings faced with increasing cost pressure to increase efficiency and productivity of technical building operations by, e.g., reducing the impact of unscheduled and undetected deviations in the operation of critical equipment, such as ventilation systems. |
| <b>Wearhealth</b> | GE | WearHealth derives from the combination of state-of-the-art machine learning methodologies with a focus on an interoperable software platform rather than a specific wearable/IoT device.<br>It enables to move from reactive to proactive prevention by providing context-rich insights about worker safety and health hazards in real time.  |

## Fit 4 Start #9 – Graduated startups

### HEALTHTECH

|                 |    |   |
|-----------------|----|---|
| <b>Cohesys</b>  | CA | Developing surgical adhesives for reduction of bone fracture.   |
| <b>HuMiX</b>    | LU | Spin-off from the University of Luxembourg, developing microbiome diagnostic for Colorectal cancer ('CRC') treatment. |
| <b>ViewMind</b> | AR | Developing an early Alzheimer diagnostic solution.  |
| <b>XScope</b>   | GE | Developing an e-stethoscope for COPD diagnosis.   |

### SPACE

|                           |    |  |
|---------------------------|----|--|
| <b>GlobeEye</b>           | FR | GlobeEye develops new sets of data and insights based on satellite images and their interpretation, relying on frontier technologies in deep learning and big data. Notably, it provides economic and financial implications of those datasets |
| <b>NoHunger (3DFarms)</b> | UK | Aeroponics is NASA space technology. 3Dfarms optimises this technology to achieve 50x less expensive and 2x more productive vertical farms.  |
| <b>Respectus</b>          | LU | RespectUs provides space companies with a one-stop-shop online tool to manage compliance risk and licenses. The solution will enable companies to prove their compliance and to ensure their reputation in their market.                       |
| <b>WEO</b>                | LU | WEO provides spatial and seasonal information on land cover and derivatives for a diverse range of applications such as food security monitoring, sustainable urban planning, drought monitoring, resource management and water allocation.    |
