"Artisan Hub: Empowering Creativity for All"

Artisan Hub is an exciting project dedicated to creating a vibrant and inclusive community house and maker space, open to all individuals who aspire to create something remarkable. Our core values revolve around fostering a strong sense of community, promoting sustainability, and providing crucial economic support to the local creative ecosystem.

At Artisan Hub, we believe that creativity knows no bounds and should be accessible to everyone. Our welcoming space is designed to encourage collaboration, learning, and artistic exploration. Whether you're a seasoned artisan or a novice looking to try something new, our doors are open to you. Sustainability is at the heart of our operations. We prioritize using eco-friendly materials and implementing energy-efficient practices. Through workshops and events focused on sustainable artistry, we aim to inspire our community members to create with the planet's well-being in mind.

Furthermore, Artisan Hub is deeply committed to supporting the economic growth of our local community. By providing affordable studio spaces, access to tools and resources, and organizing artisan-led workshops, we empower individuals to turn their passions into viable businesses. We actively encourage collaboration and networking among our community members, fostering an environment where economic success is shared and celebrated.

Join us at Artisan Hub as we build a thriving community that embraces the creative spirit, promotes sustainability, and provides essential economic support to local artisans. Together, let's unleash the power of creativity for a brighter, more prosperous future.

The vision of our organization (ASBL) GoldenME is a society in which all generations are equally digital included so that no one is left behind. Nowadays, socially included is closely tight to 'digitally included'. Our mission is to provide information and educational opportunities to non-digital natives so they can become digitally literate through collaboration across different age groups. One way we achieve this is through the SmartphoneCafé, where younger people assist older individuals with their questions about digital devices. At this event, held in a café, younger participants take the time to connect with and support the older generation through technology.

Our next step is to expand our network of senior volunteers who can serve as role models to other non-digital natives and help them acquire new digital skills. These volunteers will provide support and guidance to their peers, making the learning process easier and more accessible for everyone involved.

The ecofriendly travel experience

Matthias has the ambition to launch the concept of the "Refuges périurbains" that were implemented in Bordeaux and that have a huge success! More than 2500 clicks the first day when the booking opens.

In conjunction with local associations, Bordeaux Métropole encourages social and solidarity-based projects, as well as itineraries that make the most of the refuges in the suburbs: solidarity-based tourism, unusual vacations for out-of-towners, hikes to discover the city with an overnight stopover in a refuge... Social, solidarity or sports associations, cultural centers, activity centers... if you'd like to offer an unusual outing to your public, we can coordinate the pre-booking of your nights in a Refuge. A camping kit (comforters, lamps, water bottles, etc.) can also be lent to associations developing projects with a social vocation.

iam_
EBeauty

iam_Ebeauty, before Ebeauty, comes from Essential Beauty, everything that is essential for our physical and mental well-being/beauty. It was life's circumstances (illness, pandemic, entrepreneurship in cosmetics distribution, etc.) that inspired me to develop this concept.

The platform aims to offer every woman, whatever her origin, status or religion, a caring space where they can find themselves and recharge their batteries. The platform offers beauty workshops such as skin care, self-make-up, sport, dance... and also aims to make women aware of the impact of their consumption. Conferences, wellness breaks, broadcasts and beauty boxes for women and children are also planned.

I also want to give low-income women access to these services. My wildest dream would be to create a social beauty institute.

Aquaponics
Luxembourg

Because more and more of us want to eat healthy, seasonal, locally produced, environmentally-friendly food.

Because a production activity can be combined with an educational activity and a rethinking of the urban landscape as a place to live and exchange.

Because Luxembourg imports 97% of its fruit and vegetables, and the lack of water in neighbouring countries is a risk for the supply in Luxembourg. Because an aquaponics system uses 90% less water than a traditional system.

Because local production is vital for the planet and limits CO2 emissions.

Because we need to reintroduce the seasons to our children
And above all, because we like to get together and share moments around a good table with good produce,

So our aquaponic farm project in Luxembourg is just what our community needs right now.
