

European Data Hub

European Data Hub provides services and white rooms in a fully underground Tier IV certified **data centre**. It is operated by European Data Hub in partnership with major global players in the data centre, ICT and DCIM business. This combination, unique in Europe, brought a double accreditation from the Uptime Institute in Design and Operations. The strength of such strategic partnerships has enabled EDH's to gain a wide range of accreditations including the new benchmark in Energy Management ISO 50001. This puts European Data Hub's site among the most certified data centres in the world.

Since its inception, European Data Hub has positioned itself as an expertise and skills based business in Luxembourg serving **Fortune and Global 500 corporations** as well as large local institutions.

 **WORLD HOSTING DAYS**
01 > 03/04/2014
EUROPAPARK - RUST - GERMANY

Luxembourg for Business functions as a so called ‘network agency’ and promotes international business in the interest of the general Luxembourg economy.

Luxembourg for Business also provides companies with a ‘one-stop-shop’ for detailed information on business opportunities in Luxembourg and hands-on administrative guidance. It gives companies easy access to key decision makers in Luxembourg. You can ask for start-up assistance from the same people who work on the legal framework and on the policy drafting.

Luxembourg for Business also aims at developing Luxembourg as an attractive environment perfectly fit to the needs of the digital economy. It triggered i.a. the Government’s decision to provide the country with state-of-the-art technical infrastructure, data centers and ultra-high speed connectivity to all major European centers.

The **Chamber of Commerce** is a public institution encompassing all sectors of business (except agriculture and the skilled craft industry).

Membership of the **Chamber of Commerce** is mandatory for all selfemployed individuals, commercial companies, and branches of foreign companies established in Luxembourg and active in the commercial, financial or industrial sector. Today, the **Chamber of Commerce** has some 50,000 affiliated members, representing 80% of GDP and 75% of total employment. The primary task of the Chamber is to express and represent the general economic interest. On this basis, the institution promotes an open, dynamic and competitive economy in order to enable companies to benefit from unrestrained development. It also supports the promotion of Luxembourg companies and products abroad and encourages foreign investment.

DATACENTER.EU

Datacenter Luxembourg (www.datacenter.eu) was founded in 2000 by two ICT driven and innovative entrepreneurs. The company offers reliable datacentre infrastructure, international Internet and telecom connectivity, managed e-Commerce and housing services. Datacenter has been at the forefront of the industry for more than ten years, with a unique offering of multi-tier datacentres, from Tier I to Tier IV. Customers who are looking for a flexible cloud computing service can take advantage of our tailor-made solutions that range from our “*entry cloud*”, delivering affordable virtual machines running on high performance and standalone servers; to our “*private cloud*”, featuring dedicated VMware servers and clusters.

If you want to know more, join us in the Luxembourg Lounge.

EBRC, Luxembourg’s ICT “One-Stop-Shop”, provides highly secure Cloud, Data Centre, Business Continuity as well as ICT and Security Managed services. EBRC has become a European Centre of Excellence in the Sensitive Information Management. TRUST and Security are at the heart of EBRC global and integrated offer. EBRC Trusted Services are built upon 3 Tier IV certified Data Centres (unique service provider worldwide), international accreditations (ISO 27001, ISO 20000, ISO 14001, ISO 9001, PCI DSS Level 1, eco Star Audit) and prestigious national and international recognitions. Very present in the financial market at the beginning, EBRC has developed over the years a unique know-how in the design, implementation and operation of critical e-business and e-commerce infrastructures.
