Hall 03

PAVILION B66 & B70

THE GOVERNMENT
OF THE GRAND DUCHY OF LUXEMBOURG
Ministry of the Economy

Das Ministerium für Wirtschaft informiert über Luxemburg als Investmentstandort. Das Ministerium bietet interessierten Unternehmen einen maßgeschneiderten Service an:

- Informationen über Kosten, Einreise und Einwanderung, Personal und andere Rahmenvorschriften in Luxemburg
- Beratung zu Finanzierungs- und Fördermöglichkeiten
- praktische Hilfe einschließlich Besuche von Büro- und Industrieparks
- fortlaufende Unterstützung auch nach der Ansiedlung.

The Ministry of the Economy offers comprehensive information about Luxembourg as a business location as well as guidelines and tailor-made settlement support for companies interested in setting up in Luxembourg:

- information on cost, market entry and immigration, human resource and other framework regulations
- advice on financing and incentive opportunities
- practical help including visits to offices and industrial parks
- continuing support after setting-up

The **Luxembourg BioHealth Cluster** brings together the actors in the biomedical field and aims to enhance the Grand Duchy's reputation as an attractive environment for biomedical research, innovation and business. It includes private companies, public research organisations and specialised service providers as well as strategic partners such as government ministries and the National Research Fund.

With a principal focus on molecular diagnostics, the Cluster also covers fields such as new therapeutics, bioinformatics, medical device and telemedicine. It provides its members with added-value services to support them in their R&D, innovation and business challenges and to increase their visibility. A dedicated Cluster management team at Luxinnovation, the National Agency for Innovation and Research, is in charge of the daily operational tasks.

The Cluster provides foreign companies interested in locating activities in the Grand Duchy with information about the Luxembourg biomedical sector. We can advise you on available support measures, assist you in identifying suitable premises and put you in touch with relevant collaboration partners to set up your activities in Luxembourg.

Ai Mediq S.A. specializes in the development of non-invasive medical devices for the treatment and rehabilitation of cardiovascular, cerebrovascular, metabolic and neurological disorders based on innovative Self Regulated Treatment (**SRT®**) technology and using Interval Hypoxic Treatment (IHT).

ReOxy is a new breathing therapy medical device, that provides a patient with a treatment using dosed levels of reduced level oxygen (hypoxic gas mixtures). **SRT®** technology relies on the principle of individual biological feedback, where patient bodily reaction defines key impact parameters (individual hypoxic load) and controls them throughout the whole treatment period. Built-in intelligent software automatically identifies and suggests key treatment parameters for an individual treatment programme, based on the results of the hypoxic test.

ReOxy provides:

- Interval Hypoxic Treatment (IHT) in mode «Hypoxia-Hyperoxia»
- Hypoxic Preconditioning
- Hypoxic Test

CEODEUX MEDITEC is the official supplier and partner of the major actors in the **gas industry**. We propose gas medical supply systems and components to improve the manipulation of gas in the medical sector. Leader on the integrated valves market, our success depends on three values:

- **The safety** provided by our products,
- **A high level of quality** guaranteed by our **ISO 13485** quality system and **CE** marking,
- **The innovation** thanks to an experienced R&D Team among the most advanced in the industry

Undisputable European actor, we are also able to propose a high level service because of our presence on following markets: America, Africa, Middle East, Australia, China... Ceodeux is a part of the **Rotarex group**, gas specialist and leader for more of 90 years in cylinder valves, fittings, regulators as well as HP and UHP equipment manufacturing. The group with its headquarters in Luxembourg includes production and sales in Luxembourg, France, Spain, Germany, UK, Poland, Czech Republic, Singapore, North and South America among many others. As a market leader in this field of activities Rotarex has the certification **ISO 9001** and can assure all customers of the best quality and services.

High-performing products and services from DuPont Medical and Pharmaceutical Packaging.

Founded in 1802, **DuPont** puts science to work by creating sustainable solutions essential to a better, safer, healthier life for people everywhere.

DuPont offers a wide range of innovative products and services including **DuPont™ Tyvek®** for sterile packaging.

Used in virtually every form of sterile medical packaging, **DuPont™ Tyvek®** is the material of choice for pouches, lidstock, vent patches and headers for bags. It is available from **DuPont Medical & Pharmaceutical Packaging**, a business which addresses medical device manufacturers' and sterile packaging manufacturers' needs to ensure that end-users receive the highest performing medical packaging available.

Only **DuPont** manufactures **Tyvek®**.

TRUE POSITIVES. TRUE NEGATIVES.

Fast-track diagnostics specialise in the design, development and manufacture of infectious disease detection kits that use Real-time PCR. Our assays are validated on clinical samples and detect a comprehensive range of pathogens that are in routine daily use in laboratories worldwide. Developed with the clinical needs of the patient in mind, our range is based on the syndromic approach with all significant pathogens being detected for each disease category. We have a commitment to research and diagnostic laboratories in the emerging world. Our kits are used by the GABRIEL network, for projects funded by the Wellcome Trust and the Bill and Melinda Gates Foundation-funded PERCH project.

IEE is a global leader in automotive safety sensing systems for occupant detection and classification with products such as OC™, BodySense™, Seat Belt Reminders and Protecto™, enhancing safety in vehicles produced by major car manufacturers worldwide.

IEE has also developed technologies for mobile health and home care, mainly in the areas of vital signs and user behavioural monitoring. Here, we have focused on real-life use, integration ease, system robustness, and mobility. Our proposed technologies consist of a remote vital signs camera, a wearable respiration sensing system, a non-invasive presence detection system, and a smart foot sensor. These technologies are dedicated to individual, daily usage and provide feedback to the user on their current state.

Founded in 1989 and headquartered in Luxembourg, **IEE** employs 1,900 people worldwide. More than 10% of our workforce is dedicated to research and development. For the past two decades, we have demonstrated outstanding performance in innovation and have an impressive record of growth to show for it.

LABORATOIRES RÉUNIS

LABORATOIRES RÉUNIS is a private laboratory for medical analysis with more than 50 years of experience, testing the complete portfolio in the domain of clinical biology and microbiology. The accredited ISO 15189 high-tech laboratory is recognized for Research, Development, and Innovation (R&D) while renowned as an attractive international partner for Healthcare Biotech activities and businesses.

LABORATOIRES RÉUNIS represents more than 200 staff members and has developed a nationwide network of over 50 blood withdrawal centers.

LABORATOIRES RÉUNIS focuses also on business activities related to molecular diagnostics and personalised medicine. The constant progress in medical biology and new molecular methods has enabled the department of microbiology to develop a large panel of new techniques for the diagnosis of infectious diseases.

LABORATOIRES RÉUNIS is the preferred international partner for specialised testing in genetics, genomics and molecular diagnostics of these infectious diseases and the national leader in the field of predictive genetics. In the last seven years its team has developed and validated a unique panel of phenotypic and genotypic markers.

TRI-NEOSCOPY®: 3D SURGERY IN FULL-HD AND WITHOUT 3D GLASSES!

It is not only cinemagoers that find it irritating to have to wear 3D glasses to see the latest blockbuster. Doctors performing laparoscopic surgery find them even more frustrating. Realising the severity of the problem, Luxembourg-based Neo Medical Systems' CEO François Scalais tackled the challenge to **develop a system that provides 3D laparoscopic images in operating rooms without the drawbacks of traditional 3D glasses.**

Initially Neo Medical Systems was exclusively dedicated to surgical equipment's distribution in Belgium and Luxembourg. Following the recent introduction of 3D Laparoscopic surgery (also called mini-invasive surgery), the start-up seized new market opportunities. Therefore, Neo Medical Systems made an important strategic move by investing massively in R&D. The company has also been granted innovation aid and has been officially accredited Private Research Centre, both by the Ministry of Economy of Luxembourg.

Neo Medical Systems has developed Tri-Neoscopy™, the world's first surgical screen displaying a 3D image in Full-HD but without the need of wearing 3D-passive glasses. This has been made possible thanks to his unique and patented head tracker, called SurgiTrack™!
