

Luxembourg for Business functions as a so called ‘network agency’ and promotes international business in the interest of the general Luxembourg economy.

Luxembourg for Business also provides companies with a ‘one-stop-shop’ for detailed information on business opportunities in Luxembourg and hands-on administrative guidance. It gives companies easy access to key decision makers in Luxembourg. You can ask for start-up assistance from the same people who work on the legal framework and on the policy drafting.

Luxembourg for Business also aims at developing Luxembourg as an attractive environment perfectly fit to the needs of the digital economy. It triggered i.a. the Government’s decision to provide the country with state-of-the-art technical infrastructure, data centers and ultra-high speed connectivity to all major European centers.

The Chamber of Commerce of the Grand Duchy of Luxembourg

The Chamber of Commerce is a public institution encompassing all sectors of business (except agriculture and the skilled craft industry) representing the interests of all self-employed individuals, commercial companies, and branches of foreign companies established in Luxembourg. Today, the Chamber of Commerce has more than 50,000 affiliated members, representing 75% of total employment and 80% of GDP.

The 6 operational missions of the Chamber of Commerce are:

- Involvement in the legislative procedure
- Promoting the creation and development of businesses
- Promoting foreign economic and commercial relations
- Fostering a system of education and training that meets the needs of businesses
- Providing services to business and the general public
- Informing the public and stimulating debate as partner of the market economy (think tank and proposals of policy)

European Data Hub in Luxembourg provides operations and IT services as well as white rooms in a fully underground Tier IV certified data center. It is operated in partnership with prominent global players in the data centre, ICT and DCIM business. This proven approach has increased capabilities and brought in a wide range of certifications including a double accreditation from the Uptime Institute in Design and Operations. With expertise gained through partnerships European Data Hub now provides data center operations consulting along with serving local and Fortune/Global 500 corporations.

LU-CIX stands for Luxembourg Commercial Internet eXchange. LU-CIX was founded in 2009 based on a cross-industries initiative set up by major national and international Internet players, with the aim of developing the Internet in Luxembourg.

The LU-CIX model of openness and neutrality is based on the philosophy of already existing international centers. Thanks to LU-CIX, companies generating IP traffic and attracted to Luxembourg by the favorable economic environment, are in a position to find all the means and tools to carry their traffic to all Internet users around the world. This Internet exchange point permits the various Internet service providers to exchange Internet traffic between their networks, and thus directly connect the content providers and international Internet operators located in Luxembourg.

Founded in 2006 and located in the heart of Europe, LuxConnect designed, built and operates four state-of-the-art Data Centers, providing in total 14.700 m2 of server room surface across Luxembourg.

LuxConnect is a multi-tenant Data Center provider of carrier neutral and multi-Tier design certified (Uptime Institute) Data Centers. Being Green IT-aware, LuxConnect incorporated the latest technologies, the most powerful green energy and water management solutions, into each of its Data Centers in order to maximize their energy efficiency. LuxConnect's Data Centers are also POPs of LU-CIX, the Luxembourg Commercial Internet eXchange.

LuxConnect also operates its own optical fiber network (1.000 km) throughout Luxembourg, connecting all the national commercial Data Centers redundantly and gives operators a choice of more than 13 country breakouts to Germany, France and Belgium.

root S.A., a subsidiary of XBT Holding Ltd., established itself as an international hosting provider with the launch of the server.lu platform; operated in Tier 2 and Tier 4 data centers in Luxembourg and a Tier 3 data center in Singapore. Together with its web hosting platform site.lu, root S.A. is currently the biggest IaaS provider in Luxembourg. This success is due to the cost-effectiveness and reliability of our solutions, while maintaining a high flexibility which is needed in the ever-changing IT environment. Currently, we are in the process of launching servers.com, which is being developed with the ambition to become the number one hosting platform globally. Supported by XBT's know-how, servers.com will remodel and consolidate our entire service portfolio.

Telecom Luxembourg Private Operator S.A. (TLPO) is a private operator based in Luxembourg, offering Datacentre and connectivity services, with underlying networks operating on an optical fibre infrastructure. Telecom Luxembourg Private Operator also offers a full range of managed services aimed at professional customers and international telecom operators. In December 2014, TLPO has launched Luxembourg Web Services (LWS).

LWS is a powerful, secure and the first "Public Cloud" 100% hosted in Luxembourg. LWS is a platform that allows you to greatly simplify complex engineering problems while deploying applications, written in different programming languages (Java, PHP, ...), into the cloud. More specifically, to build a scalable complex environment, with just a few clicks. At present, the engineer needs to know how to build a highly scalable environment, but not necessarily do it manually.
